STUDENTS DISPLAY SKILLS AS CENT EXHIBIT PRODUCTS

Students offering the course titled Acquisition of Practical Skills in Entrepreneurship ((ENT 302) displayed the products of their prowess through fabricating, moulding, baking and other skills in practical fulfilment of the course content during an exhibition recently organised by the Centre for Entrepreneurship (CENT) of the University. The Vice-Chancellor, Professor Joseph Fuwape represented by the Dean of Engineering and Engineering Technology, Professor Aremu Akintunde expressed his delight in the beautiful display of different products ranging from cloths to bags, shoes, interior decoration, electrical appliances and toiletries. He also said that the programme is not only meant to develop entrepreneurial skill but it is capable of producing great inventors and entrepreneurs of tomorrow, saying the education acquired from the classroom and practical experience acquired from the Centre have made participants complete 21st Century students.

The Director of the Centre, Dr. Ayo Ajayi thanked the Vice-Chancellor and the University Management for making the event possible. He said the exhibition is not just to display products but also a grading exercise. He commended the commitment of the students to ensuring the success of the programme saying some of the products displayed are assembled in the Centre while some are handmade. He advised the students not to allow the skills and experience acquired in the course of the exercise to end with the class.
